FILTRATION WITHOUT LIMITS

Complete filtration solutions for every industry, application and technical requirement.

BUCHAREST • LARNACA

One partner. A world of solutions.

Advanced Industry Solution Romania & Advanced Industry Solutions Cyprus LTD

We connect our customers' technical requirements with the capabilities of specialized filtration manufacturers.

- Extensive portfolio for air, water and industrial fluid filtration
- Standard products, technical equivalents and custom-made solutions
- Commercial and technical support for projects in Romania and Cyprus

Any size. Any application.

Filtration designed around your needs.

FROM REQUIREMENT TO SOLUTION

01 We assess the medium and operating conditions

02 We identify suitable media and filtration efficiency

03 We adapt shape, dimensions and configuration

04 We offer custom manufacturing to specification

HEPA & HVAC Filters

Solutions for air quality and process protection.

- Panels, cassettes, compact and V-bank filters
- Bag filters and pleated media
- Filtration ratings tailored to each application

AHUs & HVAC Systems

Filtration integrated into ventilation and air-conditioning systems.

- Filters for air handling units
- Replacement and retrofit for existing installations
- Configurations for commercial and industrial use

Cartridges & Dust Collection

For demanding environments, equipment and industrial processes.

- Cylindrical, conical and pleated cartridges
- Filter bags and dust collection systems
- Antistatic options and specialized media

Technical Filter Media

Flexibility in media selection and construction.

- Rolls, felts, nonwovens and sheets
- Synthetic and multilayer media
- Flow, efficiency and resistance tailored to the application

Kitchen Hood & Metal Filters

Solutions for commercial kitchens and specialized applications.

- Metal baffle and mesh filters
- Corrugated structures and washable elements
- Manufactured to equipment dimensions

Water, Oil & Fluid Filtration

Filtration solutions for water, oil and industrial process fluids.

- Water filter cartridges and systems
- Oil, hydraulic and lubrication filters
- Custom filters for process fluids

Can’t find the right filter? We can develop it.

Custom solutions for new, existing or hard-to-source equipment.

WHAT TO SEND US

- Photo, part number or technical drawing
- Dimensions and tolerances
- Filtered medium, flow rate and temperature
- Required efficiency and operating conditions
- Quantity and required lead time

Quality tailored to every requirement

Choosing the right filter starts with understanding the application.

We work with manufacturing partners and can supply solutions for projects involving established brands, subject to technical and commercial requirements.

- Performance-driven technical selection
- Materials and construction adapted to the application
- Documentation and certifications where available and requested
- Support for replacement, optimization and customization

HAVE A FILTRATION
CHALLENGE?

Tell us about your application. Together, we will identify the right solution.
